# Half Year Report 2022

East Capital Multi-Strategi

**Important Notice** Historic yields are no guarantee for future yields. Fund units can go up or down in value, and investors may not get back the amount invested. Key investor information documents and prospectuses are available at <u>www.eastcapital.com</u>.

This Half Year Report is a translation from the original Swedish version, the latter being the official version. In the case of discrepancies between the English translation and the Swedish original, the original takes precedence.

### Contents

General market comment	ŀ
East Capital Multi-Strategi	5

Global growth forecasts saw broad-based downward revisions during the first half of the year as Russia's invasion of Ukraine had multiple implications on supply chains which further fuelled inflation. Following the launch of the invasion, the West responded with historically unprecedented sanctions towards Russia, including the freezing of Russian central bank assets. Russia countered by weaponizing its gas supply towards the EU and reducing Nord Stream 1 gas deliveries to approximately 20% of their maximum capacity. For countries such as Germany and Italy, with a significant dependence on natural gas, the ramifications of these developments have been significant as the supply of gas cannot easily be replaced and there is a tangible risk of gas rationing in Europe within the coming quarters.

In the US, energy is less of a concern as the country, to a large extent, is self-sufficient given its own production; however, the strong economic recovery stimulus, in the wake of the pandemic, has resulted in a very tight labour market and the domestic economy is now overheating, giving rise to the possibility that inflation expectations could become entrenched. For China, the slowdown has been worse than anticipated as Covid-19 lockdowns have disrupted manufacturing, investment, and consumption.

Against this backdrop, central banks have made the fight against inflation their key objective and their efforts have been concentrated on reducing demand, mainly by hiking rates in the hope that a higher cost of capital will dampen consumption and that companies will scale back on investments and new hires. So far this year, the US FED increased rates from 0.25% to 2.5%, with further hikes expected in the second half. The US has also shifted from quantitative easing to tightening with the aim of reducing their balance sheet.

On the geopolitical side, there is no clear end in sight for the Russia-Ukraine conflict while, at the same time, Sino-US relations have further deteriorated, characterized by both elevated military tensions in the South-China Sea and trade sanctions.

For investors, the continued heightened geopolitical tensions, energy supply shortages and hawkish central banks, have acted as headwinds for risky assets, and we are unlikely to see substantial improvements until inflation is on a clear downward trajectory or until the geopolitical landscape improves significantly.

Looking at equity market performance during the period, MSCI World (developed markets) fell 20.6% and MSCI Emerging Markets fell 17%. This decline in emerging markets was driven by the weakness in the Chinese market, with a 13.4% drop on the back of regulatory worries, mainly affecting the tech sector. Moreover, investors were apprehensive over the continued slowdown in Chinese growth, exacerbated by the uncertainties surrounding the resurgence of new Covid-19 cases and the possibility of continued outbreaks. In addition, EM countries, especially those neighbouring and/or located close to Ukraine/Russia, recorded the weakest performance. As investment sentiments deteriorated in those regions, there was increased investor uncertainty and, in general, investors became more cautious.

Among EM countries, Hungary and Poland were the weakest, correcting 33% and 32%, respectively. By contrast, Chile (+6%), Turkey (+6%) and Brazil (+1%) were the only EM countries with positive performance in H1 2022. Both Chile and Brazil benefitted from the strong performance of commodity stocks which historically do well in periods of high inflation.

Note: The information in this report represents historical data and is not an indication of future results.

### East Capital Multi-Strategi

### Management report

The Fund declined 12% during the first six months (in SEK). The net asset value was 266m SEK as of 30 June 2022, to be compared to 342m SEK as of 31 December 2021. Net outflows during the year amounted to 35m SEK.

#### The Fund's changes during the period

At the start of the year, the Fund had an equity allocation of 65% which by end of 2022 H1 was 62%. This reduction was primarily related to the sharp decline in the Fund's exposure to Russian equities, something that was partly offset by an increased allocation towards Chinese equities. Within fixed income, we maintained our reduced exposure to long-term government bonds, with a continued focus on corporate bonds with a limited sensitivity to rate hikes.

### The Fund's risk exposure

During the period the fund was primarily exposed to the following risks: market risk, credit risk, interest rate risk, currency risk, liquidity risk, political risk and legal risk.

The asset allocation of the fund is intended to be flexible and it will maintain the ability to switch exposure as market conditions and other factors dictate. The fund aims to maximise returns from a range of emerging markets assets, including debt securities, currencies and equity. As a result, the risk exposure of the fund has varied between various factors during the period although, in general, investments in emerging market economies are generally more volatile compared with equivalent assets listed on developed markets.

The fund has been exposed to market risk through movements in market prices and the return of the fund has been subject to foreign exchange movements as the fund's assets consists primarily of securities listed in other currencies than the fund's base currency. The value of the debt-related instruments and any income generated from them, are affected by changes in interest rates, general market conditions and other political, social and economic developments, as well as by specific matters relating to the assets in which they invest. There is a risk that the issuers of fixed income investments may not be able to meet interest payments nor repay the money they have borrowed. The fund invests in below investment grade and unrated debt securities. The lower the credit quality of the issuer, the greater the risk of default and therefore potential loss of investment.

The fund has been exposed to Floating rate notes (FRNs) that has a variable coupon payment. The FRNs pay a varying amount of interest and the global yield of the FRNs cannot be defined before their maturity.

The liquidity risk in the fund is higher than a fund that invests in large companies and/or sovereign bonds listed on developed markets. This means that it can be difficult to sell holdings in the market without negative effects on the price. Liquidity risk is managed by monitoring subscriptions, redemptions as well as bid/ask spreads, holding sizes and the nominal value of issued securities to estimate liquidity both in normal and stressed market conditions.

Emerging markets are also generally more susceptible to political and legal risks. Country specific risks have been analyzed and managed using research by internal specialists on the region and publicly available macroeconomic and business indicators.

#### Objective

The investment objective of East Capital Multi-Strategi is to provide a combination of long-term capital growth and interest income.

The Fund pursues risk diversification through active asset allocation and by investing, indirectly through fund units or directly, in equities and debt securities globally and will actively seek exposure to emerging markets to draw on the Management Company's extensive knowledge and experience in these markets.

With long term capital growth means the growth expected of fund investments over a period of five years.

#### Investment Policy of the Fund

The Fund will invest at least 30% and at most 80% of its assets directly in debt securities or indirectly through the use of UCITS or other UCIs which in turn invest in debt securities. The Fund will further invest at least 20% and at most 70% of its assets directly in equities and equity related securities or indirectly through the use of UCITS or other UCIs in equities and equity related securities.

Cash at banks can range between 0-50% of the Fund's net assets, however any higher allocation to cash at bank is expected to be temporary, for example following larger inflows to the Fund or during extreme market conditions.

The Fund's investment focus is global and diversified and as such unrestricted in terms of industry, geography, sector and market capitalisation.

Emerging Markets are defined as countries not classified as developed by the recognised major indices, or which are considered as low or middle income countries by the World Bank.

#### Important Note

From 13 December 2018 the feeder fund East Capital Pension, which invested in the Master UCITS East Capital Multi-Strategi has been restructured and renamed to East Capital Multi-Strategi a stand-alone Swedish UCITS.

On April 1, 2022, the feeder fund EC Offensiv was merged into East Capital Multi-Strategi.

Pursuant to the Swedish Investment Fund Act (2004:46), East Capital Asset Management S.A. has been appointed to act as Management Company of the Fund.

Note: All performance figures in the management report are in EUR unless otherwise stated.

\* The annual report and half year report of the Fund are available at the registered address of the Management Company.

### East Capital Multi-Strategi Special note to the Financial Statements as at 30 June 2022

### **Conflict in Ukraine**

On February 24, 2022, the Russian Federation initiated a military conflict in Ukraine leading to closure of the Russian Stock Exchange on 25 February. As of this date the fund contained Russia and Russia related equity securities representing 3.16% of the portfolio. Due to the low exposure the Board of Directors of the Management Company decided not to suspend the determination of the net asset value and apply fair value pricing (see below – Valuation of Russian securities) for the relevant securities.

### Valuation of Russia and Russia related equity securities

The valuation instructions for Russia and Russia related equity securities at the date of the Semi-annual Financial Statements are outlined below:

Classification – Statement of investments and other net assets (in EUR)	Condition	Instruction
Shares – Russia and Russia related (inaccessible)*	Securities listed on exchanges domiciled in the Russian Federation and sanctioned via the Specially Designated Nationals and Blocked Persons (SDN) List maintained by the Office of Foreign Assets Control (OFAC)	Value at last available price and apply an 90% valuation haircut
Shares – Russia and Russia related (inaccessible)	Securities listed on exchanges domiciled in the Russian Federation	Value at last available price and apply an 81.50% valuation haircut
Shares – Russia admitted to trading on a local stock exchange listing (inaccessible)	Depositary receipts listed on exchanges located outside the Russian Federation and associated with companies domiciled in the Russian Federation	Value at last available price of the equivalent local listing and apply an 81.50% valuation haircut

\*Inaccessible is defined as securities which are currently not possible for the fund to trade over the local market of listing.

### **Reporting principles**

This Half Yearl Report has been prepared in accordance with the Investment Funds Act (SFS 2004:46), the Swedish Financial Supervisory Authority's regulations on investment funds (FFFS 2013:9) and the Swedish Investment Fund Association's recommendations for the reporting of key performance indicators pertaining to investment funds.\*

The value of any cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received are deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as the Fund(s) may consider appropriate in such case to reflect the true value thereof.

Securities admitted to official listing on an official stock exchange or traded on any other organised market are valued at the last available reliable price on such stock exchange or market, unless such a price is not deemed to be representative of their fair market value.

The financial derivative instruments which are not listed on any official stock exchange or traded on any other organised market are valued in accordance with market practice.

Fund Shares/Units in undertakings for collective investment in transferable securities ("UCITS") are valued at the latest price determined and obtained from the Master Fund. Both unrealised and realised profits and losses are reported in the accounts.

The Fund(s) holdings in shares and other financial instruments have been valued with prices taken at 22.00 CET.

\* Assets and liabilities are reported at their fair value.
